## **ARTIST BIOGRAPHY**

ZOMBIES IN MIAMI is a project created by Cani & Jenouise and despite the name they are not crawling around Miami, but shining out their light from Mexico. The couple became one of the most prominent members of Mexico's vital electronic scene over the last decade. You can call their sound a rhythmic and synth-driven house and techno hybrid, with a disco and balearic twist, which is held together by the oh so sweet Italo Drama.

After highly acclaimed EPs and tracks for such diverse labels as Gerd Janson's Running Back, Jennifer Cardini's Correspondent, Prins Thomas's Internasjonal they released their first album "2712" in Permanent Vacation.

They play regularly in the top clubs in the world like Berghain / Panorama Bar, Robert Johnson, Nitsa, Lux Fragil, Good Room, Vent and also festivals such as Sonar, Fusion, Burning Man, Garbicz, Mutek and many more. They started their own label called Creatures of the Night. Besides Zombies in Miami they have another project influenced in techno & experimental live music called Planet ZIM. They are expecting to release an EP under this name in 2022 and to play some special Live Acts in Europe for 2023.
